

AFGHANISTAN – TAJIKISTAN - PAKISTAN

TRANSBOUNDARY WATER WORKSHOP

Distance Learning Module (DLM) #17

QUESTIONS

INTERNATIONAL WATER INFORMATION SHARING & CONSTRUCTION OF UPSTREAM INTERNATIONAL PARTNERSHIPS WITH DOWNSTREAM WATER DESIRES

1. What areas of education about water are most needed in Central and South Asia?
2. Because water management is highly complex, what would be some good methods to ensure the most fair distribution between upstream water sources and downstream water uses?
3. How can the best religious principles of the region be used to the most advantage of local people in water usage?
4. Where are the best hydro-engineers prepared?
5. How can water quality and quantity information be most easily collected and shared across borders to help in flood control and in allotting water for irrigation downstream?
